## Biography

Arran Arctic (a.k.a. Arran Southall) is a D.I.Y. musician and artist who has been independently producing and releasing music for almost two decades. When he's not recording in his home studio, he's doodling, knitting and generally being creative in any way possible!

Arctic's musical canon weaves elements together from the folk, pop and electronica genres, featuring a variety of individually layered instruments. Drawing inspiration from artists such as PJ Harvey, Asobi Seksu and Iain Archer, every Arran Arctic release endeavours to offer something fresh.

In equal measures intimate, eerie and touching, follow Arran Arctic wherever creative winds may take him!
